DEC	DEC	iCOM	NASCOM	SEQUOIA
DELTA SYSTEMS	DELTA SYSTEMS	IDS	NCR	SHARP
DIGICO	DIGICO	NEC	NEC	ZORBA

Applications

When you need to distribute your software in a very large number of formats, the Timeclaim Inter-Disc Copier is the system for you. Gone are the days of laborious machine-machine file transfer with wires, now you can put a disc in the appropriate drive, format and initialise a disc, then copy your files.

What happens when your branch offices submit data on disc from their own various computers?

Simple – read the discs on the Inter-Disc Copier and either use the data in a program running on the system, copy to the format of your in-house microcomputer, or copy to 1/2" magnetic tape for your mini or mainframe computer.

When not using it as an Inter-Disc Copier you can run your 8 or 16 bit Accounts, Payroll, Spreadsheet or Word Processing packages using the system either as a single unit or as part of a multiuser network.

For software development use Compilers, Assemblers, de-bugging tools or the optional EPROM programmer.

Technical specification

The Inter-Disc Copier is an expandable multiboard microcomputer using the 80 Bus, with the following features:-

High resolution screen

87 key keyboard

System drive – choice of 96TPI SS floppy drive

Or 5.4 Mb Winchester (formatted)
or 16 Mb Winchester (formatted)

Copying drives – 96TPI 800k floppy disc drive
48TPI 400k floppy disc drive

RS232 serial interface
Centronics parallel interface

CP/M 2.2 operating system
Software for analysis and addition of new formats

- Options: 8" double sided, double density disc drive
- 3.5" double sided, double density disc drive
- 1.6Mb 96 TPI disc drive
- 3" disc drive
- 16 bit 8088 processor board
- 1/2" open reel magnetic tape drive
- Hopper feeds for bulk copying
- IEEE 488 interface
- RAM disc (Memory drive) 0.5Mb or 1Mb
- Printer

TIMECLAIM

currently supply more than 350 formats installed on the system
and offer a continuous update service.

Please ask for further information on options and details.

Prices include keyboard, monitor, cabling, cases, PSUs's and comprehensive documentation.

Floppy based version	£3,000
5.4Mb Winchester version	£3,750
16Mb Winchester version	£4,300

Options: 8" DSDD disc drive

3.5" DSDD disc drive

(when supplied with 8")

1.6Mb 5.25" High Density drive

CP/M → MSDOS utility

Format update service
