10th January 1989.

Dear

er Paul,

For some time now we have continued to support products manufactured by us and others, at times at the expense of other activities. The charges for repair work and exchange equipment has remained unchanged for two years and we now feel it is right to revise these in keeping with current costs.

In taking this action it also gives us the option of supplying a new replacement, which will of course help cut down the waiting period; something we will all be glad to see.

Effective from the first of this month the Fixed Repair charges shown on the back page of the price list will be increased in accordance with the attached summary.

Barre.

Barrie Oliver.
